

DEWATERING PERFORMANCE SIMPLIFIED

PRIMEBLEND™ POLYMER PREPERATION SYSTEM for Municipal and Industrial Wastewater Treatment

The PrimeBlend emulsion poly system is a compact, self-contained solution designed to optimize polymer preparation while minimizing polymer usage and maximizing efficiency.

Our BABA-compliant system delivers proven performance and reliability, backed by a quality design that offers considerable cost savings.

Originally developed as a key component of Prime's Rotary Fan Press® package, the PrimeBlend offers a simple, cost-effective polymer solution that meets a wide range of mechanical dewatering needs.

RFP Mounted system

Freestanding System

With over 200 systems in operation, the PrimeBlend offers:

- Max feed rate 8 GPH
- Manual or automatic operation
- Stainless steel skid, control panel, and mixing chamber
- Option of stainless steel or PVC plumbing
